

PREPARED FOR JARON JAGGERS

CMS Roofing & Restoration

Go-to-Market Audit, Operating Plan & Sequence System

Part 1 Preliminary GTM Audit

Part 2 GTM Operating Plan

Part 3 Email, SMS & Sequence System

Prepared by Charles Sherwood · September 2026

Based on public information. Real figures replace estimates once CMS data is reviewed.

CMS Roofing & Restoration: Preliminary GTM Audit

Prepared for: Jaron Jagers, CMS Roofing & Restoration (Bowling Green & Owensboro, KY)

Type: Outside-in audit. Public information only, no logins or internal data.

Prepared by: Charles Sherwood · September 2026

1. Scorecard

Area	Grade	What we found
Credentials & proof	 Green	GAF Master Elite, Versico Authorized (commercial), FORTIFIED Provider, BBB A+ (accredited since 2012), a 25-year workmanship warranty, "10,000+ roofs," and a reviews page with named reps. This is a real advantage, and most local competitors can't match it.
Website basics	 Green	Clear headline, "Request a Free Professional Inspection" above the fold, click-to-call (270-843-5405), dedicated service pages (Residential, Commercial, Storm, Insurance, FORTIFIED), FAQ and Resources. Google Tag Manager is installed.
Lead capture & speed-to-lead	 Red	The contact form is a basic 5-field website form (name, email, phone, message). Its auto-reply is turned off , so someone who submits it gets no confirmation. It doesn't ask for property address, service type, or whether there's an insurance claim. The page source shows no CRM, chat, or text-back tool. Listed hours are Mon–Fri 8:00–5:30 and closed weekends, which is when a lot of storm-damage demand shows up. (<i>A mystery-shop test will confirm response times.</i>)
Local listings (NAP consistency)	 Red	The business name, address, and phone number don't match across directories. Two street addresses appear (308 vs. 384 Old Scottsville Rd). Two phone numbers appear (270-843-5405 on the site, 270-784-4757 on BBB). The start date varies too ("since 2005," "since 2006," "over 20 years"). The Birdeye profile is unclaimed. Mismatches like these weaken Google Maps ranking.
Reviews & reputation	 Yellow	About 100 Google reviews at roughly 4.2★ (per Birdeye's aggregate). That's more reviews than most local independents (Hale ~14 at 4.4★, Keen ~49 at 4.7★), but a lower rating. The visible negative reviews mention finish quality and warranty follow-through. No owner replies were visible in the aggregated view (<i>to verify on Google directly</i>).
Financing & offer	 Red	Financing isn't mentioned anywhere on the site. Best Choice Roofing, a national operator with a Bowling Green location, promotes financing, same-day inspections, and a branded warranty. CMS's "Metal for the price of asphalt" line shows up in a customer review but isn't featured on the site.
Local SEO coverage	 Yellow	Only 2 of the 6 named service cities have their own page (Bowling Green, Owensboro). Elizabethtown, Franklin, Glasgow, and Portland TN don't, and neither do Russellville, Smiths Grove, or Beaver Dam. No active blog.
Paid social (Meta)	 Red	No active ads in the Meta Ad Library for CMS Roofing & Restoration. Nothing is running for storm response, financing, or retargeting website visitors, while the national competitor advertises in the same market. The Facebook profile uses a different logo (round "Wind · Hail · Water" badge) than LinkedIn and the website.

Area	Grade	What we found
LinkedIn	 Red	105 followers, listed as 11–50 employees. The profile image is a letterboxed logo (black rectangle with white bars) and there's no banner . The last post (about a month ago) is homeowner content ("Kentucky summer heat can be tough on your roof"). LinkedIn is where commercial owners, facility managers, referral partners, and future hires look, and none of them are being spoken to. It's also where outbound prospects will click to check CMS out.
Google Ads	 Pending	To check in the Google Ads Transparency Center.
Mobile speed	 Pending	Next step: PageSpeed Insights (mobile) test. The site is built on Duda.

2. Top 3 quick wins

Win 1: Respond to every lead within 5 minutes, including nights and weekends

What: Turn on the form auto-reply today (it's a setting). Then add instant text-back for new web leads and missed calls, and cover after-hours and weekends through a service or a rotating on-call rep.

Why it matters: Homeowners with storm damage call 2–3 roofers, and the first one to respond usually gets the inspection. Research on inbound leads has repeatedly found that contact rates drop sharply after the first 5 minutes.

Impact estimate: *[Fill in with Jaron's numbers]* Leads per month × improvement in contact rate × close rate × average ticket. Illustrative example: 60 leads/month, 10% more of them reached, a 30% close rate, and a \$12K average ticket works out to about **\$21K/month in added revenue**.

Win 2: Make the business name, address, and phone identical on every listing

What: Pick one address and one main phone number. Update Google Business Profile, BBB, Birdeye (claim it), Yelp, Nextdoor, Angi/HomeAdvisor, Yellow Pages, and the builders association listing. If call tracking is the reason for a second number, handle it properly with the main number as primary.

Why it matters: Google trusts consistent listings, and that trust feeds Maps rankings for "roofer near me" and "roof replacement Bowling Green." It costs little and compounds over time.

Impact: More visibility in the Maps results, which is the highest-intent free traffic a roofer gets.

Win 3: Lead with financing and make the form qualify the lead

What: Add a financing option ("Roof now, pay monthly") to the homepage and form. Add three form fields: property address, what they need (repair / replacement / storm-insurance / commercial), and whether they've filed a claim.

Why it matters: An unexpected roof replacement is a big expense for most homeowners. Financing removes the reason to put it off, and it's a lever the national competitor already uses. Better form fields let the team route storm and commercial leads to the right person immediately.

Impact: Higher conversion on replacement quotes, fewer wasted inspections.

Also: fix the LinkedIn page before any outbound goes out. Every commercial prospect who gets an email will look CMS up. Today they'd find a cropped logo, no banner, and posts about home roofs. See the LinkedIn plan in the 3-Phase Plan.

Also: reply to every Google review, starting with the negative ones. A calm, specific public reply can protect the next buyer's trust even when the original reviewer never updates.

3. The outbound opportunity

CMS has credentials most local roofers don't: **Versico commercial certification, GAF Master Elite, and FORTIFIED.** Those support outbound selling to buyers who own or manage many roofs and buy again and again, not just to single homeowners waiting on the next storm.

Target	Why they buy	Offer angle
Property managers (apartments, rentals)	Many roofs, recurring leaks, tenant complaints	Portfolio roof-condition report + priority repair response
HOAs & condo boards	Shared roofs, reserve-fund planning, board liability	Free roof-condition assessment for the next budget cycle
Commercial owners & facility managers (industrial, retail, churches, schools)	Flat/low-slope roofs, leaks disrupt operations	Versico-certified inspection + a maintenance plan
Realtors & home inspectors	Roofs kill or delay deals	Fast pre-listing roof certifications / repair turnaround
Insurance agents	Clients with storm claims	A trusted, certified referral partner for claims work

Recurring maintenance agreements with property managers and commercial owners also smooth out the dependence on storm season.

4. 30 / 60 / 90 plan

First 30 days: stop the leaks

- Auto-reply on; text-back for web leads and missed calls; after-hours/weekend coverage
- Fix name, address, and phone across all listings; claim Birdeye; tidy Google Business Profile
- Start replying to reviews; set up an ask-for-a-review step after every job
- Mystery-shop baseline and lead-source tracking in place

Days 31–60: convert more of what already comes in

- Launch financing; upgrade the form; add a follow-up sequence for quotes that aren't signed yet
- Build city pages for Elizabethtown, Franklin, Glasgow, Portland TN, and Russellville
- Build the first outbound list: property managers, HOAs, and commercial owners in Warren and Daviess counties

Days 61–90: add a pipeline that doesn't depend on storms

- Run outbound campaigns to commercial and property-manager accounts (offer: roof-condition assessment)
 - Launch a realtor and inspector referral program
 - Monthly report: leads by source, speed-to-lead, close rate, revenue per lead
-

5. What we need from you to go deeper

1. **CRM / job-management access** (or an export). What's used today to track leads and jobs?
2. **Lead sources and monthly volume.** Web form, calls, referrals, HomeAdvisor/Angi, storm canvassing, ads
3. **Close rate by source**
4. **Average ticket.** Repair vs. replacement vs. commercial
5. **Residential vs. commercial mix** (revenue and job count)
6. **Current marketing spend** by channel, and who manages it
7. **Call tracking.** What's behind the 270-784-4757 number, and are calls recorded?
8. **Google Business Profile manager access** (read-only is fine to start)

With these, the full audit replaces the estimates above with real dollar figures.

CMS Roofing & Restoration: GTM Operating Plan

For: Jaron Jagers

From: Charles Sherwood

Builds on: the Preliminary GTM Audit

Jaron's directives, in his words: go through all lists and leads, find the best path to new revenue, identify cost of acquisition and lifetime value, build funnels, implement training SOPs, say up front what I can and can't do, name the hires needed and when, make the business forecastable, and keep finding new revenue streams.

This plan answers each one, in order, with dates.

0. How I'd work (the first 2 weeks)

No new tools, ads, or hires until I've seen the numbers. Week 1–2 is a **diagnostic**:

1. **Pull every list we have.** CRM/job software export, estimates (signed and unsigned), past customers, insurance-claim jobs, commercial accounts, HomeAdvisor/Angi leads, call logs, the inbox the website form sends to.
2. **Clean and tag it.** One master list with: source, date, service type, residential/commercial, address, ticket, status (won / lost / open / no response).
3. **Remote ride-along.** A video walk-through with an estimator on a live inspection, screen-share sessions with the office, and 20 recorded calls if they exist. What happens to a lead from first ring to signed contract?
4. **Deliverable at Day 14:** a one-page "State of Revenue". Where leads come from, what they cost, what converts, what leaks, and the 3 moves worth the most money. You approve the plan before anything is built.

1. The numbers we'll run the business on

These are the numbers "imperative to know." Most will be *estimates* at Day 14 and *measured* by Day 60.

Metric	Formula	Why it matters
Speed-to-lead	Minutes from inquiry to first human contact	The #1 driver of inspections booked
Lead → inspection %	Inspections ÷ leads, by source	Shows which sources are real
Inspection → signed % (close rate)	Signed ÷ inspections, by source and by rep	Finds coaching gaps and bad lead sources

Metric	Formula	Why it matters
Average ticket	By repair / replacement / insurance / commercial	Drives every forecast
Gross margin per job	$(\text{Revenue} - \text{materials} - \text{labor} - \text{subs}) \div \text{revenue}$	CAC has to be judged against margin, not revenue
CAC (cost to acquire a customer)	$(\text{Marketing spend} + \text{sales cost for the channel}) \div \text{new customers from that channel}$	Tells us where the next dollar goes
LTV (lifetime value)	Gross margin from first job + repeat work (repairs, gutters, siding, maintenance) + margin from referrals they send	A roof is a 20+ year purchase. LTV has to come from add-ons, maintenance, and referrals.
LTV : CAC	$\text{LTV} \div \text{CAC}$	Aim for 3:1 or better per channel; cut channels below 1.5:1
Unsold-estimate pipeline	Dollar value of estimates given but not signed	Usually the fastest money in a roofing company
Backlog	Signed dollars not yet installed	Keeps sales pace matched to crew capacity

Forecast model (built by Day 45):

Leads by source $\times$ lead $\rightarrow$ inspection % $\times$ close % $\times$ average ticket = revenue, adjusted for season and storms. It's a live sheet, so you can ask "what if we add 20 commercial leads a month?" and see the answer.

2. Outbound: who we go after (ICP)

CMS's credentials (GAF Master Elite, Versico commercial, FORTIFIED, 20 years, two offices) win the **repeat, multi-roof buyers**. A single homeowner buys one roof every 20 years. A property manager or facility owner buys every year.

Tier 1: Commercial property owners & facility managers (low-slope/flat roofs)

- **Who:** Industrial and warehouse owners, manufacturers, retail centers, churches, private schools, medical offices, auto dealerships in Warren, Daviess, Barren, Simpson, Logan counties + northern TN.
- **Titles:** Facilities Manager/Director, Plant Manager, Maintenance Manager, Operations Manager, Property Manager, Business Administrator (churches/schools), Owner/President (<50 employees).
- **Buying triggers:** Roof age 15+ years, a recent hail/wind event, active leaks, a building sale or refinance, insurance renewal or inspection.
- **Offer:** Free Versico-certified roof condition report with photos, remaining-life estimate, and a repair-vs-replace budget for next year. Then sell a **maintenance agreement** (recurring revenue) that feeds replacement jobs.
- **Why first:** Largest tickets, recurring maintenance, and fewer local competitors certified to do it.

Tier 2: Residential property managers & investors

- **Who:** Companies managing single-family rentals and small multifamily; investors with 5+ doors (county property records show owners with multiple parcels).
- **Titles:** Owner/Broker, Property Manager, Maintenance Coordinator, Asset Manager.
- **Offer:** Priority repair response (e.g. 48-hour leak response) + portfolio roof inventory + volume pricing on replacements.

Tier 3: HOAs & condo associations

- **Who:** Associations with shared roofs, and the management companies that run them.
- **Titles:** HOA Board President/Treasurer, Community Association Manager.
- **Offer:** Roof reserve study (how much to budget, which buildings, when), timed to their budget cycle.

Referral partners (not buyers, but they send buyers)

- **Realtors & home inspectors:** Fast pre-listing roof certifications and repairs so deals close.
- **Insurance agents:** A trusted certified contractor for claims; FORTIFIED roofs can support better terms with some insurers (*verify locally*).
- **Storm-adjacent trades:** Gutter, siding, and restoration companies without roofing crews.

Where the lists come from

- County property records (PVA) for owner, property type, square footage, year built
- Apollo / Clay / LinkedIn Sales Navigator for titles and contacts
- Hail/wind maps after every storm (e.g. HailTrace or Interactive Hail Maps) → target the affected zip codes and commercial buildings
- Chamber of Commerce, BBB directories, local property-management associations
- **Our own past customers and old estimates** (the list we already own)

Outbound motion

- A 4–6 touch sequence per contact: email, call, LinkedIn, and a mailed or dropped-off condition report for Tier 1.
- Target volume once running: [X] new commercial conversations a month. Set after Day 14, based on estimator capacity.
- Measured by: meetings booked → inspections → proposals → signed, and CAC per signed account.

3. Inbound: capture and convert the demand we already get

Fix the leaks first (Days 1–30)

- **Speed-to-lead:** Instant text-back on web forms and missed calls; form auto-reply on; after-hours and weekend coverage (answering service or on-call rotation).

- **Consistent listings:** One name, address, and phone everywhere (the audit found two of each). Claim every profile.
- **Reviews engine:** An automatic review request after every completed job; reply to every review, starting with the negative ones.
- **Better form:** Address, service type, insurance claim yes/no → routed to the right person.

Then grow it (Days 30–90)

- **Google Local Services Ads** (the "Google Guaranteed" listings above the Maps results; pay per lead). Test in Bowling Green first.
- **Local SEO:** City pages for Elizabethtown, Franklin, Glasgow, Portland TN, Russellville, and Smiths Grove, plus a storm-response page that goes live after every event.
- **Financing** on every quote and on the website.
- **Storm-response playbook:** When hail hits, same day: landing page, Meta/Google ads geofenced to affected zips, text/email to past customers in the area, door-hanger routes.

The biggest hidden money: follow-up

- **Unsold estimates:** A 60-day follow-up sequence (text, call, email, financing option) on every quote that doesn't sign.
- **Past customers (10,000+ roofs):** Yearly check-up offer, post-storm inspection, gutters/siding cross-sell, referral bonus.

4. Creation systems: what runs without me

System	What it does	Built by
CRM pipeline	Every lead, estimate, and job in one place with stages, owners, and follow-up tasks	Day 30
Automations	Text-back, auto-reply, review requests, unsold-estimate follow-up, past-customer campaigns	Day 30–45
Reporting dashboard	The Section 1 numbers, updated weekly, by source and by rep	Day 45
Content engine	Crews capture before/after photos + a 15-sec video on every job → weekly Google Business Profile posts, social, website gallery, case studies for outbound	Day 45
Forecast model	Revenue forecast + "what if" scenarios	Day 45
Outbound engine	Lists, sequences, and a weekly meeting target	Day 60

5. Training & SOPs

Written, short, and trained over video with recorded walkthroughs. Each one gets a checklist and a script:

1. **Lead intake & speed-to-lead:** answering, qualifying, booking the inspection

2. **Inspection & presentation:** what the estimator shows, financing and warranty talk track, asking for the signature
3. **Follow-up:** unsigned estimates, cadence, when to let go
4. **Insurance claim process:** for the customer and for the office
5. **Job-close:** photo/video capture, review request, referral ask
6. **Commercial outbound:** research, sequence, condition-report delivery
7. **Weekly numbers meeting:** 30 minutes, same dashboard every week

6. Hires: what, when, and why

Honest version: **I won't recommend a hire until Day 14**, because the data decides. Based on what the audit already shows, here's my expected order:

When	Role	Why	Type
Day 30	Inside sales / lead coordinator	Owns speed-to-lead, scheduling, and follow-up. Almost always the highest-ROI first hire in a roofing company.	Full-time, local
Day 60–90	Commercial business-development rep / estimator	Works the Tier 1–3 outbound pipeline and does condition reports	Full-time, local; base + commission
As needed	Content / marketing help	Photo/video editing, posting, basic ads	Part-time or contractor

Production, crew leads, and insurance-supplement roles are outside my lane. I'll flag if the backlog shows we need them.

7. What I can and can't do

I own these (highest confidence):

- Systems: CRM pipeline, automations, speed-to-lead, funnels
- Data into stories: CAC, LTV, channel ROI, the weekly dashboard, and the forecast
- Pipeline: ICP, lead lists, outbound sequences, and booked meetings

I build these with your team:

- SOPs and training: I write them, record walkthroughs, and train over video. A local lead enforces them day to day.
- Hiring: role scorecards, job posts, interview questions, and the first-90-days plan for each hire

Local people handle these, with my plan behind them:

- In-person work: canvassing after storms, dropping off condition reports, chamber and realtor networking

I can't / won't:

- Estimate roofs, run crews, or handle insurance adjusting

- Guarantee storm volume or promise results before the Day 14 diagnostic
- Make claims in marketing we can't back up

8. 90-day timeline

Window	Outcome you'll see
Days 1–14	All lists and leads reviewed; State of Revenue one-pager; plan approved
Days 15–30	Speed-to-lead fixed; listings fixed; CRM pipeline live; reviews engine on; first unsold-estimate follow-up campaign sent
Days 31–60	Dashboard + forecast live; SOPs 1–5 written and trained; financing live; first commercial lists built; inside-sales hire started
Days 61–90	Outbound running; first commercial condition reports delivered; LSA and city pages live; CAC/LTV measured by channel; Day 90 review with next-quarter forecast

9. How we could structure it

Option	How it works	Good for
A. Full-time (W2)	Salary + bonus tied to revenue growth or pipeline targets	Long-term teammate; builds and runs the team
B. Contract + performance	90-day build fee/retainer + % of new revenue from channels I build (tracked in the CRM)	Test the fit with shared upside; a path to A
C. Performance only	% of attributed new revenue	Lowest risk for CMS, but needs clean tracking from Day 1, and slows the build work that doesn't pay directly (SOPs, forecasting)

My recommendation: B. A defined 90-day build with clear deliverables and performance upside, then a decision together at Day 90 on going full-time.

Location (I'm in New Mexico): Nearly all of this work is remote by nature: CRM, data, dashboards, automations, outbound, and forecasting. Here's how the rest works:

- **Fully remote.** The Day 1–14 diagnostic runs over video: a remote ride-along on a live inspection, screen-share sessions with the office, and recorded calls. A CMS point person handles anything that needs hands on the ground.
- **Local hires do the local work.** The inside sales coordinator and commercial rep are Bowling Green/Owensboro people. I build their playbook, scorecards, and dashboard, and manage the numbers with them weekly.
- **Kentucky is one hour ahead of me.** I'm on your schedule, not the other way around.

Every number marked estimate or [X] gets replaced with CMS's real data by Day 14.

CMS Roofing & Restoration: Email, SMS & Sequence System

Owner: Charles Sherwood

Note: All copy is ready to load. Bracketed fields get filled with CMS's real data in Week 1.

Companion docs: Preliminary GTM Audit · GTM Operating Plan

0. The system on one page

#	Sequence	Trigger	Audience	Channels	Length	Goal
1	New inbound lead	Form, missed call, LSA/Angi lead, chat	Homeowners & businesses who reached out	SMS, call, email	5 days	Inspection booked in <24h
1B	Booked-inspection confirmations	Appointment set	Same	SMS, email	Until inspection	Show rate 90%+
2A	Lead went cold (never reached)	Seq 1 ends with no contact	Unreached leads	Email, SMS	30 days → monthly	Re-open the conversation
2B	Estimate not signed	Estimate sent, not signed in 24h	Inspected, quoted	Email, SMS, call	90 days → quarterly	Signed contract
2C	Lost / not now	Marked lost or "not this year"	Quoted, said no	Email	6 & 12 months	Second chance
3A	Outbound: commercial	Added to list	Facility/property owners, low-slope roofs	Email, call, LinkedIn, mail	21 days	Condition report booked
3B	Outbound: property managers & investors	Added to list	Rental portfolios	Email, call, LinkedIn	18 days	Portfolio walk / first job
3C	Outbound: HOAs & association managers	Added to list	Boards & managers	Email, call, mail	21 days	Reserve assessment booked
3D	Outbound: referral partners	Added to list	Realtors, inspectors, insurance agents	Email, call, in person	14 days	Referral agreement / first referral
3E	Outbound: storm trigger	Hail/wind event in the area	Commercial + PM in affected zips	Email, call, drop-off	7 days	Post-storm inspection
4A	Reactivation: past customers	Scheduled / storm	10,000+ past roofs	Email, SMS	Ongoing	Check-ups, add-ons, referrals
4B	Reactivation: dead database	One-time blast, then quarterly	Every lead older than 90 days	Email, SMS	3 touches	Revived conversations
4C	Reactivation: old commercial accounts	One-time, then yearly	Past commercial jobs	Email, call	14 days	Maintenance agreement

Rule for every sequence: the moment someone replies, books, or signs, they exit the sequence and a human takes over, using the reply playbook in Section 6.5.

1. Infrastructure (build before sending anything)

Two sending lanes. Never mix them.

	Lane A: Warm (inbound, customers, estimates, reactivation)	Lane B: Cold (outbound)
Sent from	Main domain <code>cmsroofing.com</code>	2–3 separate look-alike domains, e.g. <code>cmsroofingky.com</code> , <code>trycmsroofing.com</code> (<i>check availability</i>), each redirecting to <code>cmsroofing.com</code>
Tool	The CRM: whatever CMS already uses (JobNimbus, AccuLynx, etc.) if it can do automations; otherwise GoHighLevel	Instantly or Smartlead
Why	Protects the main domain's reputation so quotes and invoices land in the inbox	If a cold domain gets burned, the business email is untouched

Cold-lane setup checklist

- ☐ Buy 2–3 domains; 2–3 inboxes each (Google Workspace or Microsoft), real names (Jaron, commercial rep)
- ☐ SPF, DKIM, DMARC (p=none to start, move to quarantine after 30 days) on every domain, including `cmsroofing.com`
- ☐ Custom tracking domain; **open tracking OFF** for cold (plain text reads more human and delivers better)
- ☐ Warm up every inbox for 14–21 days before the first campaign
- ☐ Cap at **30–40 cold emails per inbox per day** → 6 inboxes ≈ 200/day ≈ 4,000/month
- ☐ Verify every list (MillionVerifier / NeverBounce); drop invalids; send catch-alls in a separate, smaller batch
- ☐ No images, no attachments, max one link (and none in email 1)
- ☐ Physical address + one-line opt-out in every email (CAN-SPAM)

SMS setup

- ☐ Register A2P 10DLC (carriers block unregistered business texting)
- ☐ Add consent to the website form: *"By submitting, you agree to receive texts from CMS Roofing about your request. Msg & data rates may apply. Reply STOP to opt out."*
- ☐ Text only people who gave consent (inbound leads, customers). **No cold SMS.**
- ☐ Quiet hours: texts only 8am–8pm the recipient's local time (*have counsel confirm KY/TN rules*)

Data & tracking

- ☐ CRM fields: `lead_source`, `service_type` (repair / replace / storm-insurance / commercial), `property_address`, `segment`, `sequence`, `angle_variant`, `estimate_amount`,

estimate_date, lost_reason

- [] Every link has UTM parameters; every outbound campaign logs its angle
- [] Reply labels: Interested · Not now · Wrong person (get referral) · Not interested · Unsubscribe
- [] One booking calendar for inspections, by territory (Bowling Green / Owensboro)

List sources

- County property records (PVA: Warren, Daviess, Barren, Simpson, Logan) → owner, property type, year built, square footage
- Apollo / Clay / Sales Navigator → contacts and titles
- Hail maps after every storm → affected zips and buildings
- The CMS database: past customers, old estimates, old leads

2. Testing framework

Outbound angles we'll test

Angle	What it is	Best for	Example first-line hook
A. Clear offer / pitch	State the offer and ask directly	Commercial owners who know they have a roof problem	"We'll inspect your roof and give you a written repair-vs-replace budget for next year, at no cost."
B. Lead magnet	Give something useful first; ask for nothing	Colder, busy decision-makers; HOAs	"Put together a 1-page guide on what flat-roof repairs cost in Kentucky in 2027. Want it?"
C. Loom offer	A 60–90 sec personalized video of <i>their</i> roof from aerial imagery	High-value commercial targets (big buildings, 15+ yr roofs)	"Recorded a quick video looking at the roof on {{property_address}} from the aerial view. Mind if I send it?"
D. Proof / case study	Lead with a real, similar job	Property managers, commercial owners	"We just finished [REAL JOB] for a [similar business] in {{city}}..."
E. Trigger	Tie to a real event: storm date, roof age, a sale	Post-storm; buildings 15+ years old	"The {{storm_date}} hail came right through {{zip}}..."
F. Problem question	One question about their pain; no pitch	Short, curiosity-led follow-ups	"Who handles roof leaks across your properties right now?"

Rules

1. **Test one thing at a time.** First the angle, then the subject line, then the CTA.
2. **Minimum sample before calling a winner:** about 250 delivered contacts per variant, per segment.
3. **Primary metric: positive reply rate** (interested replies ÷ delivered). Secondary: meetings booked, inspections done, pipeline \$.
4. **Decision rules:**
 - Under 1% positive replies after 250 → kill the variant
 - 1–3% → keep and iterate the copy
 - Over 3% → scale it; becomes the control for the next test

5. **Log everything** in a shared sheet (template below).

Test calendar (outbound, first 8 weeks of sending)

Weeks	Test	Segments
1–2	Angle A vs B vs C (email 1 only)	Commercial
1–2	Angle A vs D	Property managers
3–4	Winning angle: subject line test (3 variants)	Commercial, PM
3–4	Angle B vs A	HOAs
5–6	CTA test: "worth a look?" vs "want me to send it?" vs specific time	All winners
7–8	Follow-up sequence test: 4 steps vs 6 steps	All winners

Inbound & lifecycle tests

Test	A	B	Metric
First touch	Text first, call at +2 min	Call first, text if no answer	Contact rate within 1 hour
Booking	Offer 2 specific times (default)	Send booking link	Inspections booked
Estimate follow-up	Financing angle first (Day 3)	Proof/warranty angle first (Day 3)	Estimates signed within 14 days
Reactivation subject	"Quick question"	"{{first_name}}, still thinking about the roof?"	Reply rate

Test log template

Date	Segment	Sequence/step	Variable	Variant A	Variant B	Delivered (A/B)	Positive replies (A/B)	Meetings (A/B)	Winner	Next test

3. Placeholders used in the copy

{{first_name}} · {{company}} · {{property_address}} · {{city}} · {{zip}} ·
{{rep_name}} · {{rep_phone}} · {{day_1}} {{time_1}} / {{day_2}} {{time_2}} (two real
open slots, Central time) · {{booking_link}} (backup only) · {{storm_date}} ·
{{estimate_amount}} · {{install_year}}

[BRACKETS] = fill with real CMS facts. **Never** fill a proof slot with a job, number, or client that isn't real.

Copy rules: short; plain text; no "free!!!", "guarantee", "act now", "limited time", or ALL CAPS in cold email; name the number or date instead. No em dashes in any customer-facing line.

4. Sequence 1: New inbound lead

Trigger: web form, missed call, Google LSA, Angi/HomeAdvisor, chat, Facebook lead.

Goal: a human conversation in under 5 minutes; an inspection booked within 24 hours.

Exit: booked → Seq 1B. No contact after Day 5 → Seq 2A.

When	Channel	Action

Text 1 (instant, business hours)

Hi {{first_name}}, this is {{rep_name}} with CMS Roofing. Got your request about {{property_address}}. I'm going to give you a quick call in the next couple minutes. If now's bad, just reply with a better time.

Text 1 (after hours / weekend variant)

Hi {{first_name}}, it's CMS Roofing. Got your request. Our office opens at 8am and you're first on the list. If you have an active leak, reply LEAK and our on-call team will reach out tonight.

Text 1 (storm variant, used when service_type = storm)

Hi {{first_name}}, {{rep_name}} with CMS Roofing. Sorry you're dealing with storm damage. We'll get someone out to document everything for your insurance. Calling you in a couple minutes.

Email 1 (instant)

Subject: Got your request, {{first_name}}

Hi {{first_name}},

Thanks for reaching out about {{property_address}}. {{rep_name}} is calling you shortly to set up your inspection.

If it's easier, just reply: does {{day_1}} at {{time_1}} or {{day_2}} at {{time_2}} work for us to come out?

What happens at the inspection: we check the roof, take photos of anything we find, and walk you through it. No pressure, and you'll get a written estimate either way.

{{rep_name}}

CMS Roofing & Restoration · {{rep_phone}}

Voicemail script

Hi {{first_name}}, it's {{rep_name}} with CMS Roofing returning your request about your roof. I'll send you a text too, so reply there whenever's easy. Or call me back at {{rep_phone}}. Talk soon.

Text 2 (+15 min, if no answer)

Just tried calling. Would {{day_1}} at {{time_1}} or {{day_2}} at {{time_2}} work for us to come take a look?

Text 3 (next morning)

Morning {{first_name}}. Still want us to take a look at the roof? We have openings {{day_1}} and {{day_2}}. Which works?

Email 2 (Day 2)

Subject: What to expect from your roof inspection

Hi {{first_name}},

Quick rundown so you know what you're getting:

1. We inspect the whole roof and attic where we can, about 30–45 minutes.
2. You get photos of everything we find, good and bad.
3. You get a written estimate. If it's a storm claim, we help you with the insurance paperwork.

About us: CMS has been roofing South Central Kentucky since 2006. We're GAF Master Elite (GAF's own figure is fewer than 2% of roofers) with a 25-year workmanship warranty.

Does {{day_1}} at {{time_1}} or {{day_2}} at {{time_2}} work? Just reply with the one that's better.

{{rep_name}}

Text 4 (Day 5, last)

Hi {{first_name}}, I don't want to keep bugging you. Should I close out your roof request, or do you still want an inspection? Just reply 1 to book or 2 to close it out.

Sequence 1B: Inspection booked

Confirmation (instant, SMS + email)

You're set, {{first_name}}. {{rep_name}} will be at {{property_address}} on {{date}} at {{time}}. You don't need to be on the roof or in the attic. We just need access to the property. Reply here if anything changes.

Reminder (24 hours before, SMS)

Reminder: your CMS roof inspection is tomorrow at {{time}}. Reply C to confirm or R to reschedule.

On the way (30–60 min before, SMS)

{{rep_name}} from CMS Roofing is on the way, about {{eta}} minutes out. [Photo of rep]

Estimate delivered (same day as inspection, email)

Subject: Your roof estimate for {{property_address}}

Hi {{first_name}},
Thanks for having us out. Your estimate and photos are attached / linked here: {{estimate_link}}
Short version: [ONE-LINE SUMMARY FROM REP]
Monthly payment options are available if that's easier than paying all at once. Just ask.
Any questions, text me here. I'm happy to walk through it again.
{{rep_name}}

5. Sequence 2: When an inbound lead dies

2A: Never reached (after Seq 1 ends)

Goal: re-open the conversation without being annoying. Monthly after Day 30.

Day 7: Email

Subject: Still need a roofer?

Hi {{first_name}},
We never connected on your roof request. Is it still something you need looked at?
If so, reply with a good day and we'll make it work. If you already got it handled, no worries at all.
{{rep_name}}, CMS Roofing

Day 14: SMS

Hi {{first_name}}, CMS Roofing here. Still need someone to look at the roof at {{property_address}}?
Reply YES and we'll set it up.

Day 21: Email (helpful, not salesy)

Subject: 3 signs your roof can wait (and 2 that can't)

Hi {{first_name}},
Not every roof issue is urgent. Quick guide:
Can usually wait: a few granules in the gutters, minor fading, one lifted shingle with no leak.
Don't wait: water stains on ceilings, or missing shingles after a storm. Insurance claims have time limits.
If you're seeing either of the second two, reply and we'll get out there this week.
{{rep_name}}

Day 30: Email (last in sequence)

Subject: Closing your file

Hi {{first_name}},
I'm going to close out your request so we stop reaching out. If the roof comes back up, just reply to this email and it comes straight to me.
{{rep_name}}

Then: monthly newsletter list + storm alerts (Seq 4A storm message).

2B: Estimate not signed (the biggest money in the system)

Trigger: estimate sent, not signed within 24 hours.

Goal: signed contract. Rep gets a call task on Days 2, 7, and 14.

Exit: signed, lost (→ 2C), or 90 days → quarterly.

Day 1: SMS (from the rep who inspected)

Hi {{first_name}}, it's {{rep_name}}. Wanted to make sure the estimate came through OK and see if any questions came up after you looked it over.

Day 3: Email (test: financing angle vs. proof angle)

Variant A: Financing

Subject: Your roof, paid monthly

Hi {{first_name}},

A lot of homeowners don't know this: you don't have to pay for a roof all at once. On your estimate of {{estimate_amount}}, monthly options can start around [\$X/MONTH, FROM FINANCING PARTNER].

Want me to send the details? Takes about 5 minutes to see if you qualify, and it won't affect your credit score to check. [CONFIRM WITH FINANCING PARTNER]

{{rep_name}}

Variant B: Proof

Subject: What you're getting for {{estimate_amount}}

Hi {{first_name}},

When you compare quotes, here's what's included in ours that often isn't elsewhere:

- 25-year workmanship warranty, backed by GAF
- GAF Master Elite installation (fewer than 2% of roofers qualify, per GAF)
- [REAL DETAIL: e.g. full tear-off, ice & water shield, cleanup/magnet sweep]
- Local since 2006, so we'll be here if you ever need us

Happy to go line by line against any other quote you have.

{{rep_name}}

Day 7: Call + SMS if no answer

Hi {{first_name}}, tried calling. Is there anything holding you back on the roof? Sometimes it's price, sometimes timing, sometimes you just need to talk to someone at home. Whatever it is, I can probably help.

Day 14: Email (the "which one" email)

Subject: Quick question on your roof

Hi {{first_name}},

Just want to know where you're at so I stop guessing. Which one is closest?

1. Still deciding, need more time
2. Price is the issue
3. Went with someone else
4. Not doing the roof this year

Just reply with the number. No hard feelings on any of them.

{{rep_name}}

Routing: 1 → continue · 2 → rep calls with options (financing, phased repair, material options) · 3 → Seq 2C, ask why · 4 → Seq 2C, 6-month check-in

Day 30: Email (timing)

Subject: Before the weather turns

Hi {{first_name}},

Our schedule for [MONTH/SEASON] is filling up. If you want the roof done before [winter / spring storm season], now's about the time to lock it in.

Your estimate for {{property_address}} is still good through [DATE]. [CONFIRM ESTIMATE VALIDITY POLICY]

{{rep_name}}

Day 60: SMS

Hi {{first_name}}, {{rep_name}} with CMS. Checking in on the roof. Anything change on your end? Happy to update the estimate if needed.

Day 90: Email (last, then quarterly)

Subject: Should I keep your estimate on file?

Hi {{first_name}},

It's been a few months since we looked at your roof. I'll keep your photos and estimate on file. If anything changes, like a leak or a storm, reply here and we'll prioritize you.

{{rep_name}}

2C: Lost or "not now"

Lost to a competitor (immediately): Email

Subject: Thanks for considering us

Hi {{first_name}},

Thanks for letting me know. Mind telling me in one line what made the difference? Price, timing, something we did? It genuinely helps us get better.

And if anything ever comes up with the new roof, we're around.

{{rep_name}}

Not now (6 months): Email

Subject: Checking back on the roof

Hi {{first_name}},

Six months ago you mentioned the roof could wait. Just checking in. Want us to come back out and see if anything's changed? Takes 30 minutes, no cost.

{{rep_name}}

Not now (12 months): Email. Same as above with "a year ago."

6. Sequence 3: Outbound

All outbound runs from the cold lane (Section 1). Plain text. Sender: Jaron (commercial and HOA), or the commercial rep once hired.

3A: Commercial facility & property owners (low-slope/flat roofs)

Target: owners and facility managers of industrial, warehouse, retail, church, school, medical, and dealership buildings, 10,000+ sq ft, roof 12+ years old where known.

Titles: Facilities Manager/Director, Plant Manager, Maintenance Manager, Operations Manager, Property Manager, Business Administrator, Owner/President (smaller firms).

Offer: free roof condition report: photos, remaining-life estimate, and a written repair-vs-replace budget.

Goal: book the condition report.

Day	Channel	Step
1	Email	Email 1 (angle test A / B / C)
2	LinkedIn	Connection request (no note or a short note)
3	Call	Call 1, voicemail
5	Email	Email 2 (reply in same thread)
8	Call	Call 2
10	Email	Email 3 (proof or question)
14	Mail/drop	Printed 1-page "roof budget guide" + card, or a drop-off by the rep for local targets

Day	Channel	Step
17	Email	Email 4 (new thread, new angle)
21	Email	Email 5 (breakup)

Email 1, Variant A: Clear offer

Subject: roof at {{property_address}}

Hi {{first_name}},

We're a Versico-certified commercial roofer based in Bowling Green. For buildings like {{company}}'s, we do a roof condition report: photos of every problem area, how many years the roof has left, and a written repair-vs-replace budget you can plan next year around.

There's no cost, and we'd work around your schedule.

Worth doing for your building?

Jaron Jagers

CMS Roofing & Restoration

[ADDRESS] · Reply "no thanks" and I won't follow up.

Email 1, Variant B: Lead magnet

Subject: flat roof costs in 2027

Hi {{first_name}},

I put together a 1-page guide on what commercial roof repairs and replacements actually cost in Kentucky right now, and the 4 signs a flat roof has 2–3 years left versus 10.

Useful for budgeting next year. Want me to send it over?

Jaron Jagers

CMS Roofing & Restoration

Email 1, Variant C: Loom offer

Subject: video of your roof

Hi {{first_name}},

I pulled up {{company}}'s building on aerial imagery and recorded a quick 90-second video pointing out a couple of things I'd want a closer look at on the roof.

Mind if I send it over?

Jaron Jagers

CMS Roofing & Restoration

(Only send Variant C when the Loom is recorded or can be recorded within 24 hours of a yes. Script in Section 8.)

Email 2 (Day 5, same thread)

Hi {{first_name}}, following up on this. Is roof maintenance something you handle at {{company}}, or is there someone else I should talk to?

Email 3 (Day 10, same thread): proof

Hi {{first_name}},

For context, we recently [REAL COMMERCIAL JOB: e.g. "replaced a 40,000 sq ft roof for a manufacturer in Warren County with the plant running the whole time"]. The condition report is how that started.

Would a report on your building be useful before next year's budget is set?

(No real commercial job to cite yet? Use this instead:)

Most flat-roof replacements we see could have been pushed out 5+ years with \$[X] of repairs done early. The condition report tells you which camp your roof is in. Worth a look?

Call script (Days 3 and 8)

"Hi {{first_name}}, it's Jaron with CMS Roofing in Bowling Green. I sent you a note about a roof condition report for your building. Did I catch you at an OK time for 30 seconds?"

If yes: "We do these for commercial buildings around here. Photos, how much life the roof has left, and a written budget. Takes about an hour on-site and there's no cost. Is the roof something that's on your radar, or has it been pretty quiet?"

If "we have a roofer": "Makes sense. A lot of the reports we do are a second opinion before a big spend. If you ever want one, I'm easy to find."

Voicemail: "Hi {{first_name}}, Jaron with CMS Roofing, 270-843-5405. Sent you a note about a roof condition report for your building. I'll follow up by email."

LinkedIn note (optional)

Hi {{first_name}}, I run commercial roofing at CMS here in Bowling Green. Always good to know the facilities folks in the area.

Email 4 (Day 17, new thread): trigger or question angle

Subject: who handles leaks?

Hi {{first_name}},

When a leak shows up at {{company}}, who gets the call? Is it you, or an outside maintenance company?

Asking because we set up maintenance plans for buildings here so leaks get handled the same week, not whenever a crew frees up.

Email 5 (Day 21): breakup

Subject: closing the loop

Hi {{first_name}},

I'll stop reaching out after this one. If the roof ever becomes a priority, like a leak or a budget question, just reply here and I'll get you a condition report within the week.

Jaron

3B: Residential property managers & investors

Target: property management companies; investors with 5+ doors (from PVA multi-parcel owners).

Titles: Owner/Broker, Property Manager, Maintenance Coordinator, Asset Manager.

Offer: priority leak response + a portfolio roof check + volume pricing on replacements.

Day	Channel	Step
1	Email	Email 1 (A: clear offer vs D: proof)
3	Call	Call 1
5	Email	Email 2
9	Email	Email 3
12	Call	Call 2
18	Email	Email 4 (breakup)

Email 1, Variant A: Clear offer

Subject: roofs across your rentals

Hi {{first_name}},

For property managers around Bowling Green, we do two things:

1. When a tenant reports a leak, we're there within [48 HOURS: CONFIRM CMS CAN COMMIT].
2. Once a year, we check every roof in your portfolio and give you one list: what's fine, what needs a repair, what needs replacing and when.

Worth a quick call to see if it fits how you run things?

Jaron Jagers, CMS Roofing & Restoration

Email 1, Variant D: Proof

Subject: {{city}} rentals

Hi {{first_name}},

[REAL EXAMPLE: e.g. "We handle roofs for [X] rental properties for a local owner"]. Most of the work is small repairs caught early, which keeps tenants happy and replacements off the calendar.

Open to doing the same for your properties?

Jaron

Email 2 (Day 5)

Hi {{first_name}}, bumping this up. How are you handling roof leaks across your properties right now? One go-to roofer, or whoever's available?

Email 3 (Day 9)

Hi {{first_name}}, one more idea. If you have a property with a roof you're unsure about, send me the address. We'll look at it this week at no cost, and you'll see how we work before committing to anything.

Email 4 (Day 18): breakup

Hi {{first_name}}, I'll leave it here. If a leak or a roof question comes up on any of your properties, reply and I'll get someone out fast.

3C: HOAs & association managers

Target: HOA/condo boards with shared roofs; community association management companies.

Titles: Board President, Treasurer, Community Association Manager (CAM), Property Manager.

Offer: roof reserve assessment: which buildings need what, and when, in dollars, for the reserve budget.

Email 1, Variant B: Lead magnet (expected winner for boards)

Subject: roof reserves for {{community_name}}

Hi {{first_name}},

Most HOA roof surprises come from a reserve budget built on guesses. We put together a simple 1-page checklist boards use to sanity-check their roof reserves.

Want me to send it?

Jaron Jaggers, CMS Roofing & Restoration

Email 1, Variant A: Clear offer

Subject: roof reserve assessment

Hi {{first_name}},

We do roof reserve assessments for associations: every building inspected, photos, and a year-by-year budget for repairs and replacement. Boards use it to set reserves and avoid special assessments.

There's no cost for the assessment. Would that be useful before your next budget meeting?

Jaron

Email 2 (Day 5)

Hi {{first_name}}, following up. When does {{community_name}}'s board usually set next year's budget? The assessment is most useful a month or two before that.

Email 3 (Day 12)

Hi {{first_name}}, if you manage more than one community, happy to start with whichever one has the oldest roofs. You'd see exactly what the report looks like before deciding on the others.

Mail (Day 14): printed reserve checklist + cover letter addressed to the board.

Email 4 (Day 21): breakup

Hi {{first_name}}, I'll close this out. If the board ever wants a roof assessment ahead of a budget cycle, just reply here.

3D: Referral partners

Realtors & home inspectors

Offer: fast roof certifications and pre-listing repairs so deals don't stall.

Email 1

Subject: roofs holding up closings

Hi {{first_name}},

When an inspection flags the roof on one of your deals, how long does it usually take to get a roofer out?

We turn around roof inspections and certification letters in [X DAYS: CONFIRM], and repairs before closing when needed. Figured that might save you a delayed closing or two.

Want to be on our quick-response list?

Jaron, CMS Roofing

Email 2 (Day 4)

Hi {{first_name}}, easiest way to try us: next time a roof comes up on an inspection report, send me the address and I'll show you how fast we move.

Call + drop-in (Day 7): stop by the brokerage with a one-page "roof issues on inspection reports: what's a deal-breaker and what's not" sheet.

Email 3 (Day 14): breakup

Hi {{first_name}}, I'll leave you my number, 270-843-5405. Anytime a roof holds up a deal, call or text me directly.

Insurance agents

Email 1

Subject: roof claims for your clients

Hi {{first_name}},

When a client of yours has storm damage, who do you point them to?

We document damage the way adjusters need it, handle the paperwork with the carrier, and we're GAF Master Elite and a FORTIFIED provider. Some carriers offer better terms on FORTIFIED roofs. [VERIFY WHICH CARRIERS IN KY]

Open to being a name you can hand clients?

Jaron, CMS Roofing

Follow-ups: same pattern as realtors (Day 4 email, Day 7 drop-in, Day 14 breakup).

3E: Storm trigger (runs within 72 hours of a hail/wind event)

Target: commercial buildings and property managers in affected zips (hail map).

Email 1 (within 48 hours)

Subject: {{storm_date}} storm, {{zip}}

Hi {{first_name}},

The {{storm_date}} storm hit {{zip}} with [HAIL SIZE / WIND SPEED FROM REPORT]. Damage on flat and low-slope roofs often isn't visible from the ground, and most policies have a time limit to file.

We're doing post-storm inspections for buildings in the area this week: photos and a written summary you can hand to your insurance. Want us to add {{company}}?

Jaron, CMS Roofing

Email 2 (Day 3)

Hi {{first_name}}, we still have a few slots this week for {{zip}}. Reply with a good day and we'll document the roof for you.

Day 4–5: rep drop-off with a door hanger/card, and a call.

Email 3 (Day 7): last

Hi {{first_name}}, last note on this. If you notice any leaks or damage in the next few weeks, reply here and we'll prioritize you.

(Only claim storm details that are verifiable from a hail/wind report.)

6.5 From "sounds interesting" to the meeting

Most outbound systems lose deals here. Someone replies "sure," the reply sits for a day, and they get a booking link. The rules below apply to every positive reply from outbound (3A–3E) and to inbound leads.

Who's who at CMS:

- **Inbox owner / setter:** Charles at first, then the inside sales coordinator (Day 30 hire).
- **Closer:** Jaron, the commercial rep, or the estimator who does the condition report or inspection.
- **Meeting:** for commercial, PM, and HOA, the on-site condition report or assessment. For referral partners, a 20-minute intro call or a stop-by.

Rule 1: Reply within minutes with two specific times

People often reply from their phone between other things, so answer while they're still looking at it.

- **Target:** under 10 minutes during business hours. Turn on push notifications for positive replies in Instantly/Smartlead and the CRM.

- **Don't send a booking link.** It makes them go find a slot. Give two options they can say yes to in one word.
- **Once they pick:** ask for their best email and the property address, then send the invite.
- **Invite title:** CMS Roofing <> {{company}}: roof condition report, {{property_address}}

Glad it's useful, {{first_name}}. Does {{day_1}} at {{time_1}} or {{day_2}} at {{time_2}} Central work for us to come look at the roof?

After they pick:

Perfect, {{day}} at {{time}} it is. What's the best email for the invite? And is {{property_address}} the building, or is there another one you'd want us to look at too?

Rule 2: Pre-write the answer to every reply before going live

Cold outbound gets the same handful of replies, and week one will bring all of them. Whoever runs the inbox should never type from scratch. Load these as saved replies/snippets.

"Send more info" → one result + two times

Sure, {{first_name}}. Short version: we inspect the roof, photograph every problem area, and give you a written budget for repair vs. replacement. [ONE REAL RESULT: e.g. "For a [similar building] in [county], that report pushed a \$[X] replacement out [X] years with \$[Y] of repairs."]

Easier to show you on your own building. Does {{day_1}} at {{time_1}} or {{day_2}} at {{time_2}} work?

"How much?" → a range + one question

The condition report itself is no cost. For the work, most flat-roof repairs we do on buildings your size run [\$X–\$Y], and full replacements usually [\$X–\$Y per sq ft] depending on the system. [FILL FROM CMS REAL PRICING]

Roughly how old is the roof, and has it been leaking anywhere?

"Wrong person" → ask who is; open the next email with their name

Thanks, {{first_name}}. Who handles roofs and building maintenance there? Mind if I mention you pointed me their way?

Next email, to the new contact:

Hi {{new_first_name}}, {{first_name}} mentioned you're the one who handles the building at {{company}}...

"We already have a roofer" → ask what they'd change

Makes sense, most buildings do. If you could change one thing about how roof issues get handled now, what would it be?

If they answer → "That's exactly what [the condition report / our maintenance plan] fixes. Worth a second opinion on {{day_1}} or {{day_2}}?"

"Not right now" → ask which month

No problem. Which month would be better to check back? I'll put it on my calendar and won't bug you before then.

→ Set a CRM task for that month, and remove them from the sequence.

"Take me off" / "unsubscribe" → gone within the hour, whole domain

- Remove them and **suppress the entire company domain** in the cold tool and the CRM, within 1 hour.
- Optional one-line reply: "Done. Sorry for the bother." Never argue or pitch.

Out of office → it tells you when to try again

- Read the return date, pause the contact, and resume 1–2 business days after they're back.
- If it names a colleague to contact "in the meantime," add that person as a new contact with the Wrong-person opener.

CMS-specific extras:

- **"Yes, send the guide"** (lead magnet, Angle B) → send the PDF right away. Two days later: "Did the guide help? Happy to do the real version on your building: {{day_1}} or {{day_2}}?"
- **"Sure, send the video"** (Loom, Angle C) → send the Loom within 24 hours. In the same email: "If it's worth a closer look in person, does {{day_1}} or {{day_2}} work?"
- **"We had storm damage"** → treat it as hot. The setter calls within the hour.

Rule 3: A human call before anything hits the calendar

Every "yes" gets a short call from the setter before the meeting is confirmed. That includes people who booked themselves.

Jaron writes down what a qualified buyer looks like before anything is sent. Starting draft:

Segment	Qualified if...
Commercial	Makes or influences roof decisions for the building · building is in the CMS service area · low-slope/flat or large roof (≈10,000+ sq ft) · roof 10+ years old, OR an active leak/damage, OR a budget decision within 12 months
Property managers / investors	Controls maintenance vendor choice · 5+ doors in the service area
HOAs	Board member or manager with a say in the budget · shared/association-maintained roofs · budget cycle within 12 months
Referral partners	Active agent/inspector/insurance agent in the service area · at least a few deals/claims a month

Setter call (3–5 minutes):

1. "Thanks for getting back to us. I just want to make sure the visit's worth your time. Quick questions?"
 2. "What kind of roof is it, and roughly how old?"
 3. "Anything going on right now: leaks, storm damage, or a budget coming up?"
 4. "Besides you, who else weighs in on a roof decision?"
 5. "When are you hoping to have a plan in place?"
 6. Qualified → "Great, {{closer_name}} will be out {{day}} at {{time}}. I'll send the invite now." (Book while they're still on the phone.)
- Not qualified → offer the lead magnet or a check-back month. Don't send the closer.

What this gets you:

- Bad fits never reach Jaron or the estimator.
- Everyone who reaches the closer has already said yes to a real person.

Rule 4: Show up on a second channel the same day

Whichever channel the yes came from, contact them on another one that same day. By the meeting, they've seen CMS in two places.

- **Replied to an email** → LinkedIn connection request from the same sender. **No pitch in the request.** "Looking forward to {{day}}, {{first_name}}."
- **Replied on LinkedIn or by phone** → email with the invite and one real result from their industry attached (a photo set or a short case study of a similar building).
- **Same sender name on every channel.**

Rule 5: Hand the closer the whole thread

Every booked meeting has a **handoff note** in the CRM, attached to the appointment, so the first five minutes aren't "so, tell me about your building."

Handoff note template:

```
Company / building:    {{company}}, {{property_address}}
Contact / title:      {{first_name}} {{last_name}}, {{title}}
Segment · angle:      Commercial · Angle C (Loom)
```

Message they answered: [paste the email/step]
Their reply, word for word: "[paste]"
Setter call notes: Roof type/age: ____ · Issues: ____ · Decision-makers: ____ · Timeline: ____
Objection raised: [e.g. "we have a roofer, slow to respond"]
Qualified? Yes. Criteria met: ____
Second-channel touch: LinkedIn connected [date] / email sent [date]

After every meeting, the closer marks it Good / Bad plus one line why in the CRM. Review it weekly:

- Many "bad" from one segment or title → tighten the list or the qualification criteria **that week**.
- Many "good" from one angle → move more volume there.

How this changes the outbound sequences above

- Emails in 3A–3E ask a question with no link. When someone says yes, the Rule 1 two-time reply takes over immediately.
- Weekly metrics (Section 9) add: time to reply, positive reply → meeting %, show rate, and % of meetings marked Good.

7. Sequence 4: Reactivation

All from the warm lane (cmsroofing.com / CRM). Past customers already know CMS, so this is the cheapest revenue in the system.

4A: Past customers

Annual roof check-up (every spring, SMS + email)

Subject: Your yearly roof check-up

Hi {{first_name}},

It's been a while since we put your roof on in {{install_year}}. We're doing spring check-ups for past customers: a quick look for loose flashing, clogged gutters, and storm wear, at no cost.

Want us to add you to the schedule? Reply YES.

CMS Roofing

Post-storm check (within 48 hours of a storm in their area, SMS)

Hi {{first_name}}, CMS Roofing here. That storm on {{storm_date}} came through your area. If you see any damage or leaks, reply and we'll prioritize you as a past customer.

Referral ask (30 days after install, email)

Subject: Know anyone who needs a roof?

Hi {{first_name}},

Hope the new roof is treating you well. If you know a neighbor, friend, or family member who needs roof work, send them our way. As a thank-you, we'll send you [REFERRAL REWARD: e.g. \$X gift card] when their job is done.

Just have them mention your name, or reply here with their info.

CMS Roofing

(Check KY rules on referral rewards; keep it simple and legal.)

Cross-sell: gutters & siding (60–90 days after install, and yearly)

Subject: Gutters that match the new roof

Hi {{first_name}},

A lot of our roof customers add new seamless gutters or siding once the roof's done so everything matches and drains right. If that's on your list, we can give you a quote at the same visit as your check-up.

Reply GUTTERS or SIDING and we'll set it up.

Warranty anniversary (at 5 and 10 years)

Subject: Your roof warranty, 5 years in

Hi {{first_name}},

Your roof turned 5 this year. Quick reminder that your 25-year workmanship warranty is still active. If anything looks off, reply here and we'll come check it under warranty.

4B: Dead database (every lead older than 90 days that never bought)

Touch 1: the 9-word email (plain text, from a real person)

Subject: roof

Hi {{first_name}}, are you still looking to get your roof looked at?
{{rep_name}}

Touch 2: SMS (Day 3, consented contacts only)

Hi {{first_name}}, it's {{rep_name}} at CMS Roofing. A while back you asked about your roof. Still something you need help with?

Touch 3: Email (Day 10)

Subject: new options since we last talked

Hi {{first_name}},

Since you last reached out, we've added [REAL CHANGE: e.g. monthly payment options / FORTIFIED roofs / a new crew for faster scheduling].

If the roof's still on your list, reply and we'll get you on the schedule.

Then: quarterly re-run of Touch 1 with a new subject line.

4C: Old commercial accounts

Email 1

Subject: {{company}} roof, [X] years in

Hi {{first_name}},

We did the roof at {{property_address}} back in {{install_year}}. Flat roofs last a lot longer with a yearly check and small repairs, so we're offering past commercial customers a maintenance plan: [2 INSPECTIONS/YEAR + PRIORITY LEAK RESPONSE + REPORT FOR YOUR RECORDS: CONFIRM TERMS].

Want me to send the details?

Jaron

Day 5 call → Day 14 breakup email (same pattern as 3A).

8. Supporting assets

Loom script (60–90 seconds, for outbound Variant C)

1. **(0–10s)** "Hi {{first_name}}, Jaron with CMS Roofing. I pulled up {{company}}'s building to take a quick look."
2. **(10–50s)** Share the aerial view (Google Earth, Nearmap, or EagleView). Point out 2–3 *real, visible* things: ponding areas, patched sections, discoloration, HVAC curbs, drainage. Say "worth a closer look," never "you have damage," since you can't confirm from aerial imagery.
3. **(50–75s)** "The only way to know for sure is to get on it. We do a condition report: photos, how much life it has left, and a written budget. No cost."
4. **(75–90s)** "If that's useful, just reply to the email and we'll find a time. Thanks, {{first_name}}."

Lead magnets to build (1 page each, PDF, CMS branding)

Asset	For	Contents
Commercial Roof Budget Guide (KY, 2027)	3A	Cost ranges for repair / coating / re-roof by type [FROM CMS REAL PRICING]; 4 signs of remaining life; when to repair vs. replace
HOA Roof Reserve Checklist	3C	8 questions to sanity-check reserves; typical lifespans by roof type; a sample 10-year schedule

Asset	For	Contents
Roof Issues on Inspection Reports	3D realtors	What's a deal-breaker vs. a quick fix; typical turnaround times
Storm Damage Checklist	Inbound, 3E, 4A	What to photograph; claim deadlines to check with your carrier; what not to sign

Condition report template (the actual offer deliverable)

Cover page · building details · roof type/age · photo log with notes · issues ranked (urgent / 1–2 years / monitor) · remaining-life estimate · repair budget vs. replacement budget · recommended next step.
Delivered in person when possible.

9. Rollout

Week	Build
1	Access to CRM + phone system; export and clean the database; buy cold domains and start warmup; A2P registration
2	Load Seq 1 + 1B (inbound) and turn on; form consent + fields; booking calendar; reply playbook (Section 6.5) loaded as saved replies
3	Load Seq 2A + 2B + 2C; launch 4B dead-database blast (warm lane)
4	Build lead magnets + condition report template; pull first commercial and PM lists; record first Looms
5	Qualification criteria signed off by Jaron; setter trained on the call script; cold domains warm → launch 3A (angle test A/B/C) and 3B (A/D)
6	Launch 4A past-customer program (check-ups + referral); 3D referral partners
7	Launch 3C HOAs; storm playbook (3E) ready to fire
8	First test readout → pick winners, write next variants; monthly review with Jaron

What we track weekly

Area	Metric	Early target (set real targets after Day 14 baseline)
Inbound	Median speed-to-lead	Under 5 minutes, business hours
Inbound	Lead → inspection booked	Baseline, then +[X]%
Estimates	Unsold-estimate recovery	Signed jobs and \$ from Seq 2B
Outbound	Positive reply rate by angle	2–5% is healthy for cold B2B
Outbound	Condition reports / meetings booked	[X] per week
Replies	Median time to reply to a positive response	Under 10 minutes, business hours
Replies	Positive reply → meeting booked	50%+
Meetings	Show rate · meetings marked good by Jaron	85%+ · tracked weekly

Area	Metric	Early target (<i>set real targets after Day 14 baseline</i>)
Reactivation	Replies, check-ups booked, referrals received	Baseline
All	Pipeline \$ and signed \$ by sequence	The number that matters

10. Guardrails

- **No fake proof.** Every bracketed proof slot gets a real job or gets cut. Don't name a client without permission.
- **Aerial ≠ inspection.** Never claim damage from imagery. Say "worth a closer look."
- **Storm claims:** only cite hail sizes and dates from a real weather report. Don't promise insurance outcomes.
- **Consent:** texts only to people who opted in; honor STOP immediately; unsubscribe link or line in every email.
- **One human owner per reply.** Automation starts conversations; people finish them.
